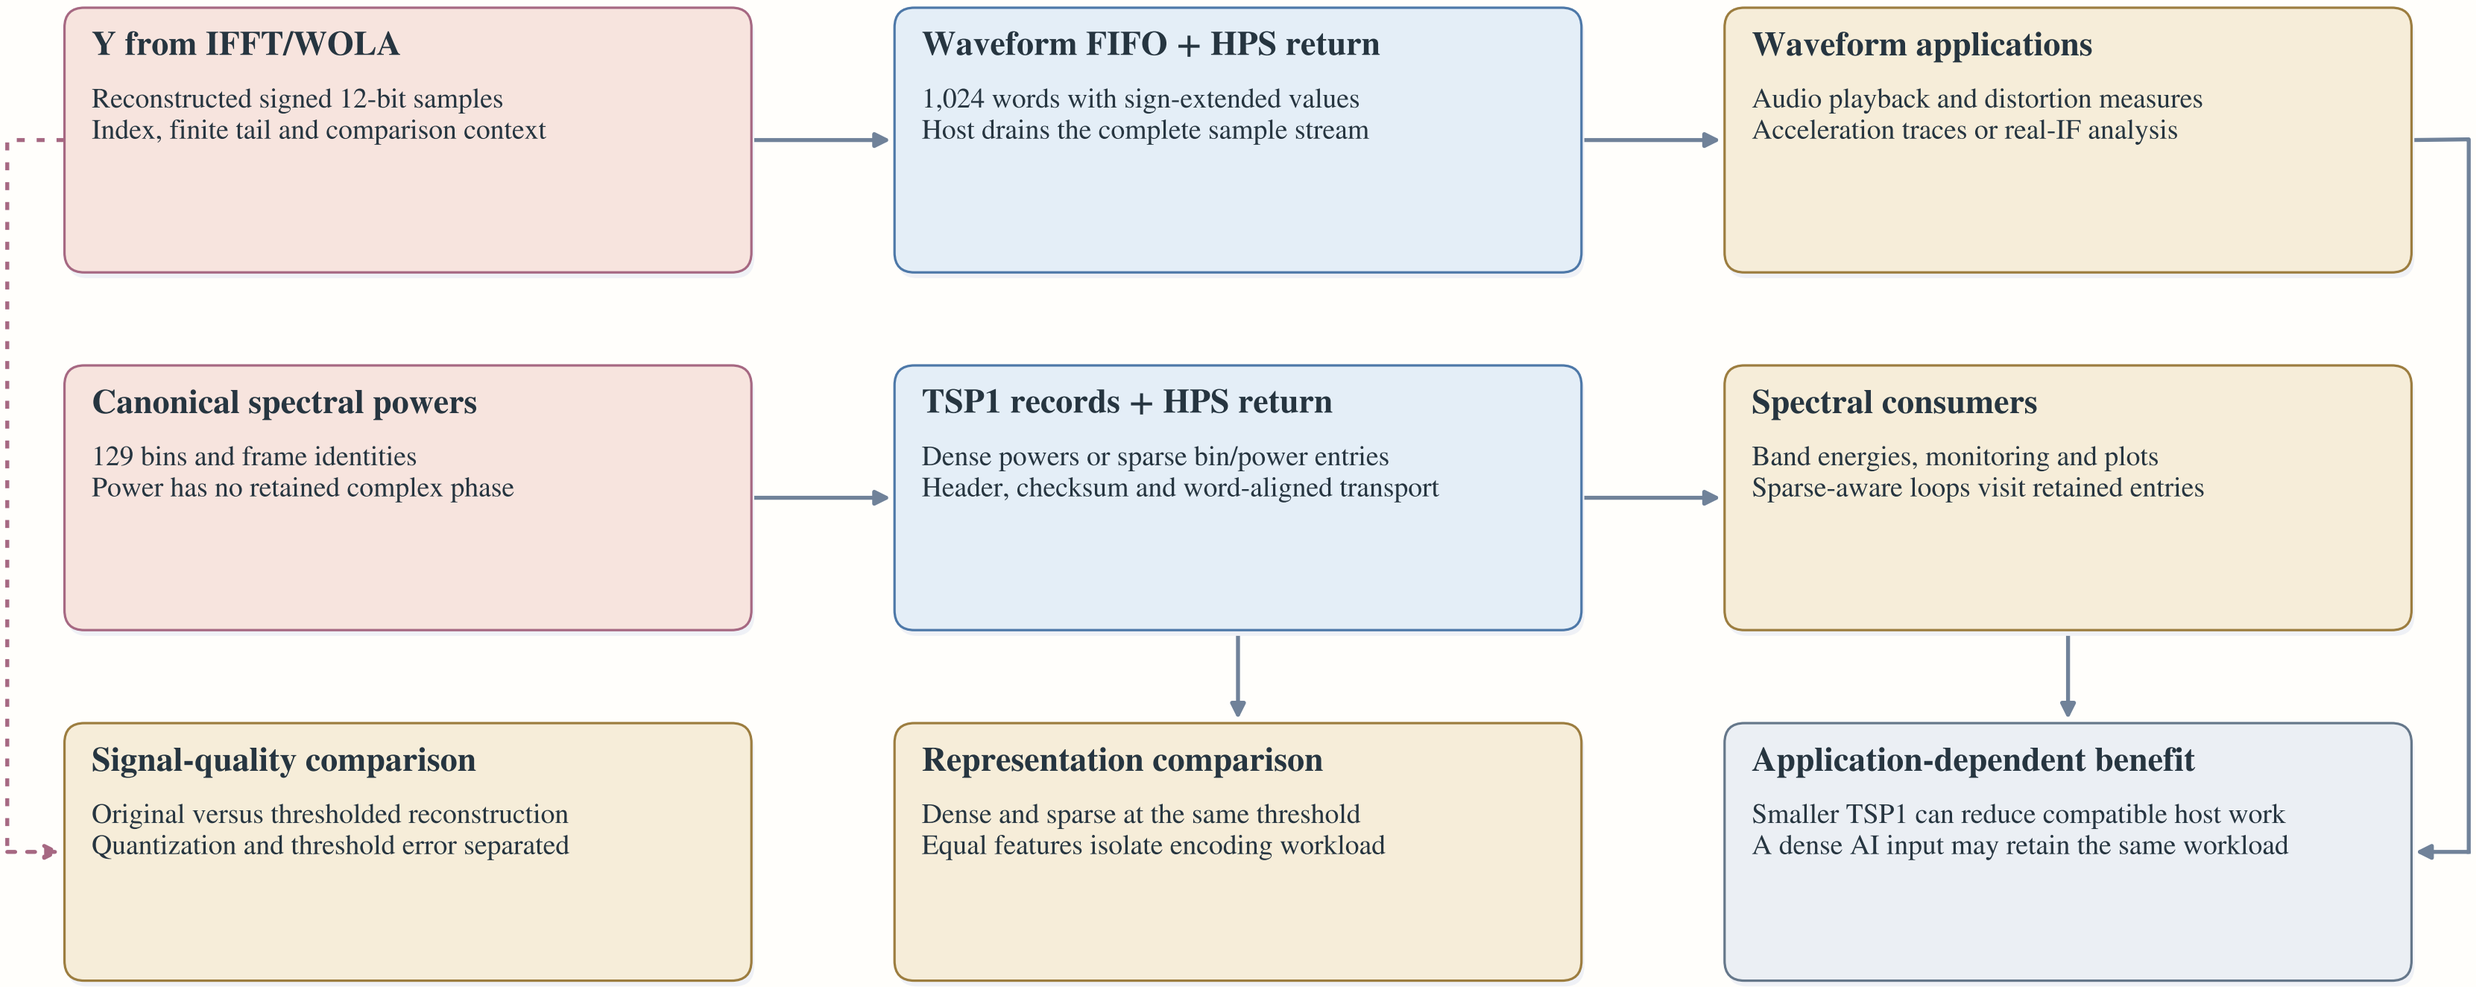
Two outputs and the work performed on the laptop

The waveform path preserves a time-domain result. The spectral path supports consumers that understand sparse power records.



Do not merge the denominators

TSP1 byte reduction is measured against dense TSP1, not WAV or raw I/Q file size. A faster sparse consumer is not a faster FPGA FFT. TSP1 alone cannot reconstruct the waveform because it omits phase.

Signal input · DSP / control · Signal outputs · Host / HPS · Storage / platform · solid: data · dashed: control
