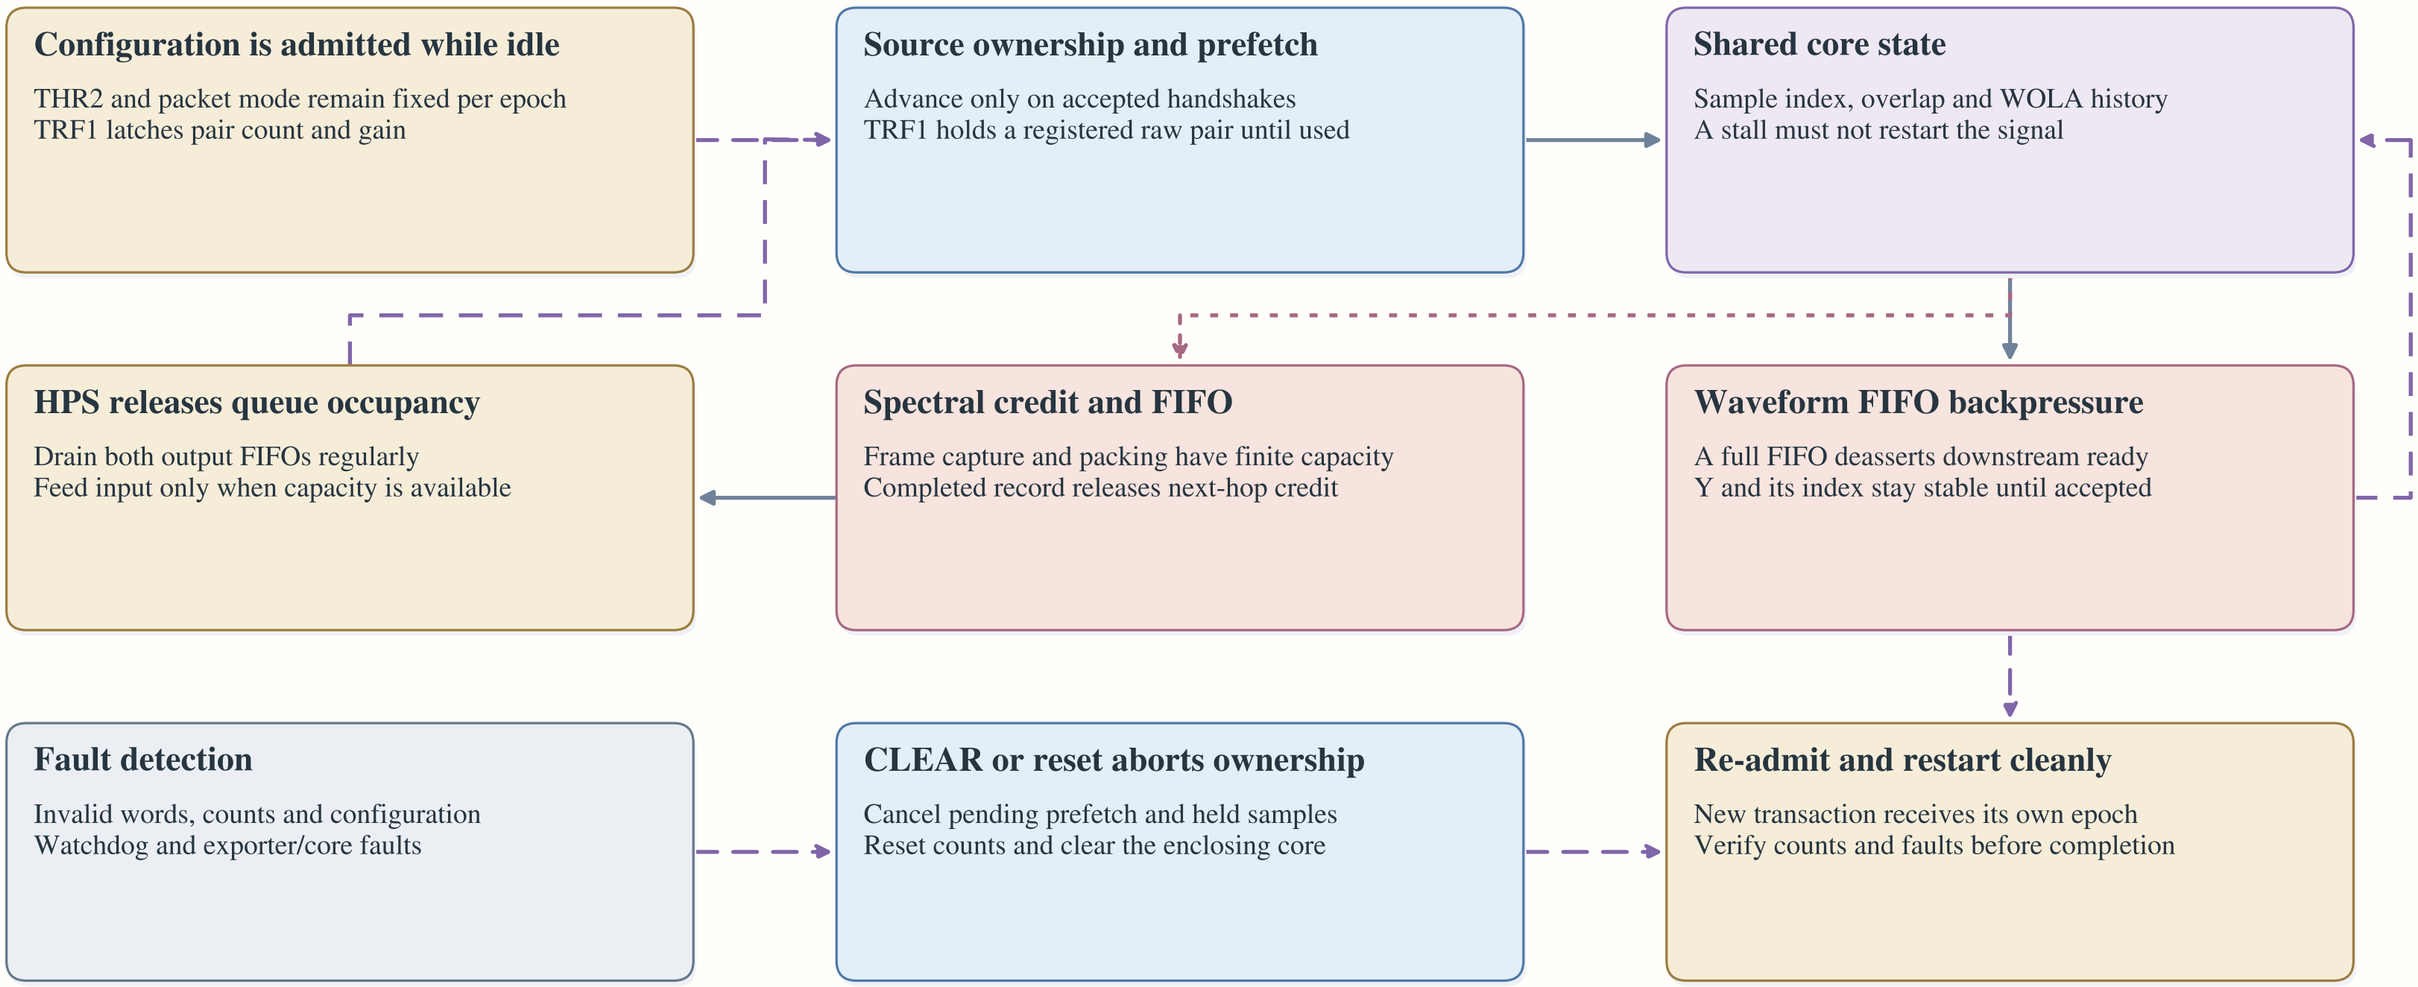
Control, buffering and recovery across the system

Transport can pause progress. Accepted samples, reconstruction history and frame identity must remain consistent.



Two different throttling mechanisms

Y has a ready/valid path. Spectral taps are valid-only, so upstream frame credit protects the exporter instead. Treating every internal link as an interchangeable streaming interface would hide this distinction.

Signal input · DSP / control · Signal outputs · Host / HPS · Storage / platform · solid: data · dashed: control

SOURCE BINDINGS: A01, R01, R02, R04, R07, C07, V01 | Reviewed source structure, not new execution or timing measurements.
